

Alpine Children's Academy

Internet Release Form

Alpine Children's Academy is really excited to open our new tech center for the children's educational and developmental usage. We know it is important for our children to experience the cutting edge of technology in an educational manner because our society relies heavily upon internet knowledge.

This is a great opportunity for our school and students to promote a fun, safe, and diverse training environment. In order to fully implement our curriculum, the children will be encouraged to take part in games and activities corresponding to the information they will be learning in class. This will be in no form a replacement to their educational curriculum our center currently has in place.

Therefore, Alpine Children's Academy is asking your permission. If you agree, and this signed form is on file with us, your child will have completely supervised access to our computers.

I, the undersigned, hereby authorize my child to have access to the internet with supervision and only for educational purposes while under the care of Alpine Children's Academy.

Child Name: _____

Parent /Guardian Signature: _____

Date: _____
